EDUCATION

Dublin City University (DCU) **Dublin, Ireland**
BSc in Computer Science (Expected May 2029) *September 2025 – Present*

- Year 1: First Class Honours (85%), ranked in the top 20 of 280 students
- Coursework: Data Structures & Algorithms, OOP, Databases, Computer Systems, Software Engineering, DevOps

Dual Diploma Program (US High School Curriculum) **Madrid, Spain (remote)**
Completed alongside Spanish Bachillerato; GPA 4.0 / 4.0 *2021 – 2024*

WORK EXPERIENCE

Bynle – Web & Software Development Studio **Dublin, Ireland**
Co-founder & Software Developer *May 2025 – Present*

- Co-founded a 3-person studio with 6+ small-business clients, owning projects from requirements to deployment
- Built a parking reservation system for a holiday-rental client: Node.js backend on Vercel, Stripe payments, and live availability synced from the Smoobu property-management API
- Building a guest-services booking platform with guest, provider and admin portals: Stripe payments confirmed by webhook, Supabase, Next.js and transactional email via Resend

Dublin City University – School of Computing **Dublin, Ireland**
Undergraduate Lab Tutor *September 2026 – Present*

- Run weekly lab sessions (4 hours/week) for first-year Computer Programming I and II, helping students debug their code and understand core programming and object-oriented design

Nando's **Dublin, Ireland**
Front of House & Back of House *October 2025 – May 2026*

TECHNICAL PROJECTS

Spectral Identifier – OSI Hackathon 2026 **Hackathon, 2026**
Python, marimo, Plotly, NumPy, SciPy, pytest

- Joined a 4-person international team mid-sprint and built the web app, with X-ray, Raman and AI literature-search tabs, for an open-source mineral identifier; merged via pull request within 12 hours
- Wrote the core layer connecting the research benchmark code to the UI, plus 7 pytest tests verifying the app reproduces the benchmark results (93.3% top-1 Raman identification, ~0.003 Å median lattice error)

SweatShot – iOS & Android Fitness App **TestFlight Beta, 2026**
React Native, Expo, TypeScript, Supabase, Zustand

- Built a cross-platform app where private friend groups post daily dual-camera workout proof to keep streaks
- Designed the Supabase data model and Zustand state layer behind real-time streaks, leaderboards and feed
- Shipped solo from design to TestFlight beta (EAS builds, external testers) and multiple App Store review cycles

VoiceCalendar – Voice-Driven Calendar Assistant **Deployed, 2026**
Python, Flask, Groq, Whisper, Google Calendar API

- Built a Flask service that transcribes speech with Whisper, extracts event details with an LLM via Groq and validates them with Pydantic before writing to Google Calendar; covered by 14 unit tests
- Exposed one core service through three interfaces (web, CLI, Telegram); deployed on Render behind a password so the paid AI API key can't be abused

ADDITIONAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, C, SQL
Frameworks & Libraries: React, React Native, Expo, Next.js, Node.js, Flask, marimo, NumPy, SciPy, Plotly
Tools & Infrastructure: Git, GitHub, GitLab CI, pytest, Linux, PostgreSQL, Supabase, Vercel, Render
APIs: Stripe, Smoobu, Google Calendar API, Groq, Whisper
Languages: English (Native), Spanish (Native), French (Native)
